

Central Lighting Inverter for Outdoor/Hostile Environments

Built like a tank, the HEU is specifically designed for outdoor locations and hostile environments. This unit has been proven for several years in the field to operate efficiently in extreme temperatures, harsh weather conditions, and withstand physical abuse and vandalism. Unique in the market, the HEU is the only outdoor central lighting inverter listed to UL924 and UL1778 UPS standards. The HEU is the solution to fulfill power requirements for emergency egress lighting in a wide variety of very challenging applications.

Key Features of the HEU

- Electronics maintain normal output when tested to 136°F (58°C) and minus -29°F (-34°C) temperatures
- Designed for remote locations where input voltage can swing from +20% to -35%
- Automatic monthly and annual self testing
- Latest technology microprocessor controlled electronics with PWM (Pulse Width Modulated) design for true Sine Wave output.
- Double Conversion, "no-break" online system powers all lamp types, including LED
- Continuous self-diagnostic and self-testing system. Automatically tests every 30 days and 12 months. Optional remote monitoring capabilities.
- Heavy-duty NEMA 3R enclosure includes weatherproof gasketing, convection and fan cooling. Optional battery heater
- Rugged steel (painted) enclosure is standard. Optional aluminum or stainless steel for exceptional corrosion resistance in very harsh environments
- Tamperproof triple-locking design includes internal steel bars, keylock, and padlocking door handle
